Summary

B.Tech student in Artificial Intelligence Engineering with practical experience in machine learning, deep learning, and data analytics. Skilled in building scalable AI systems, training deep learning models, deploying ML pipelines, and applying data-driven solutions to real-world problems. Passionate about building reliable, scalable, and impactful technology solutions for real-world challenges.

Education

Degree	Institution / Board	CGPA / %	Year
B.Tech – AI Engineering	Amrita Vishwa Vidyapeetham, Coimbatore	7.63	2022–26
12 th - State	Sri Vihan Junior College, Visakhapatnam	90.9%	2020–22
10 th - State	Sri Chaitanya Techno School, Visakhapatnam	96.5%	2019–20

Projects

Detection of Cardiovascular Diseases Nov 2023 – Jan 2024

Biomedical Signal Processing – Python, NumPy, SciPy, SVM, CNN-LSTM

Developed a machine learning system to classify cardiovascular conditions using ECG and PCG signals.

- Built a diagnostic ML system using ECG and PCG signals with hybrid CNN-LSTM and SVM models.
- Applied signal preprocessing techniques including bandpass filtering, normalisation, and wavelet transforms.
- Achieved 86.2% binary classification accuracy and implemented a multi-class disease detection pipeline.

Legal Document Analyzer & Summarizer Mar 2025 – May 2025

NLP & Deep Learning – BiLSTM-Attention, Word2Vec, NLTK, SpaCy

Developed an NLP-powered system to automatically extract, classify, assess risk, and summarize clauses from legal contracts.

- Implemented an NLP-based legal document analyzer using Word2Vec + KMeans and BiLSTM-Attention for clause extraction and classification.
- Designed a risk assessment module with heuristic scoring and an LSTM classifier, achieving 91% accuracy.
- Built a summarization system using cosine similarity, reducing manual clause review effort by 96%.

Diabetic Retinopathy Detection Apr 2025 – Aug 2025

Computer Vision – Custom CNN, U-Net, Multi-Task Learning

Developed a unified deep learning model to perform both retinal lesion segmentation and DR severity classification.

- Built a unified model for retinal lesion segmentation and DR severity classification using IDRiD and DDR datasets.
- Performed preprocessing with CLAHE, resizing, and data augmentation to improve model robustness.
- Designed a custom CNN encoder U-Net decoder model for multi-task learning.

Technical Skills

Programming: Python, C++, Java, JavaScript

ML/AI Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Hugging Face

Web & Backend: Node.js, React.js, HTML/CSS, REST APIs

Databases: PostgreSQL, MySQL

Cloud Platforms: AWS, Azure

Certifications

- Generative AI Professional** – Oracle Cloud Infrastructure [\[Link\]](#) Aug 2025
- Career Essentials in Generative AI** – Microsoft & LinkedIn [\[Link\]](#) Aug 2024
- Python 101 for Data Science** – IBM [\[Link\]](#) Sep 2024

Extra Curricular Activities

- Solved 250+ problems on LeetCode, focusing on data structures and algorithms.
- Top 20 in Bosch x Tinker Labs Hackathon and a finalist at IIT Bombay Hackathon for innovation and teamwork.
- Hobbies: Playing Guitar, Photography.

Positions of Responsibility

- Social Media Mentor**, Tensor Club, Amrita Vishwa Vidyapeetham Sept 2024 – June 2025
Guided the club's online presence, managed event promotions, and mentored juniors in tech outreach strategies.
- Security Discipline Guide**, Anokha Tech Fest, Amrita Feb 2024
Ensured smooth and safe conduct of campus-wide technical events by coordinating logistics and crowd management.
