Summary

B.Tech Artificial Intelligence Engineering student with strong foundations in software engineering and object-oriented programming. Skilled in developing scalable backend systems, cloud-based applications, and secure web platforms. Passionate about building efficient software that solves real-world problems.

Education

Degree	Institution / Board	CGPA / %	Year
B.Tech – AI Engineering	Amrita Vishwa Vidyapeetham, Coimbatore	7.61	2022–26
12th – State	Sri Vihan Junior College, Visakhapatnam	90.9%	2020–22
10th – State	Sri Chaitanya Techno School, Visakhapatnam	96.5%	2019–20

Projects

RealEstate-360

Nov 2024 – Apr 2025

Full Stack Web Development – React.js, Node.js, AWS, Google Maps API

Developed a Real estate platform combining property listings with analytics and ML for price predictions and market insights.

- Developed a full-stack property platform with secure role-based authentication and access control.
- Integrated Google Maps APIs for dynamic mapping, nearby amenities, and route-based recommendations.
- Implemented ML models to provide price predictions, ROI, and market trend visualisations.

Cloud-Based Video Streaming Platform

Nov 2023 – Jan 2024

Cloud Computing Web Development – AWS, Node.js, HTML/CSS, JavaScript

Built a scalable video streaming platform with secure user access and efficient cloud-based media delivery.

- Designed backend APIs for video upload, playback, and user session handling with Node.js.
- Integrated AWS S3 for storage and AWS Cognito for secure, role-based authentication.
- Optimized content delivery for smooth streaming across devices, ensuring high availability.

Hospital Management System

Nov 2023 – Feb 2024

Full Stack Development – Python, PostgreSQL

Developed a role-based hospital management platform to streamline appointments, billing, and medical records.

- Built an interface for patient registration, doctor dashboards, and receptionist billing panels.
- Developed Python backend with PostgreSQL for role-based access, medical report generation, and billing workflows.
- Designed a normalized database schema with tables for patients, doctors, appointments, bills, and medical records.

Technical Skills

Programming: Python, C++, Java, JavaScript

Web Development: React.js, Node.js, HTML, CSS, REST APIs

DevOps & Tools: Git, GitHub, CI/CD (GitHub Actions)

Databases: PostgreSQL, MySQL

Cloud Platforms: AWS, Azure

ML/AI: Scikit-learn, TensorFlow, Keras, OpenCV

Certifications

- Generative AI Professional** – Oracle Cloud Infrastructure [\[Link\]](#) Aug 2025
- Career Essentials in Software Development** – Microsoft & LinkedIn [\[Link\]](#) Aug 2024
- Python 101 for Data Science** – IBM [\[Link\]](#) Aug 2024

Extra Curricular Activities

- Solved 270+ problems on LeetCode, focusing on data structures and algorithms.
- Achieved Top 20 rank among 400+ teams in the Bosch X Tinker Labs Hackathon at IIT Hyderabad
- Finalist at the prestigious IIT Bombay Hackathon, recognized for innovative problem-solving and teamwork.
- Hobbies: Playing Guitar, Photography.

Positions of Responsibility

- Social Media Mentor**, Tensor Club, Amrita Vishwa Vidyapeetham Sept 2024 – June 2025
Guided the club's online presence, managed event promotions, and mentored juniors in tech outreach strategies.
- Security Discipline Guide**, Anokha Tech Fest, Amrita Feb 2024
Ensured smooth and safe conduct of campus-wide technical events by coordinating logistics and crowd management.
